If you just wanted a search in our area, I would check 369/30.76+, more specifically 369/30.85 and 34.01, as well as, 360/92. Because the claims appear to be generic and not directed to Dynamic Information Storage Retrieval, I would also get a search in class 414.

Are you sure that is the right serial number? If it is I don't work in that art. I work in classes 360, 369, and 720.

If you like, you can see the claims in eDan, and give me more or less a time in which you are available..., thanks!
